

ajet 101

(licensed version)

In the application featured in pictures below, standard **ajet 101** inkjet printer is shown in licensee housing and mounted in Combi Casing System. Printheads (shown as Altima 107s) are mounted on either side of case. As case is transported through system, two sides are printed with a total of 5 lines of print. System is installed and operating in a shrimp processing plant in Lafayette, Louisiana.

This application uses 5 **ajet 101** printers mounted inside the case handling system. Each unit can be controlled individually using the hand-held input device or can be linked to a single computer and controlled simultaneously.

For Information Contact: Sales@abmmarking.com

ajet 101 printers are mounted on opposing sides of the case handling system. Two lines of information are printed on one side and three lines on the opposite side. Printing is automatic as the case is moved through the system.
