

Convert Marsh® Unicorn™ Printers To Larger Ink Supply

High Production Environment ?

ABMarking provides a simple, cost effective way of converting your Marsh Unicorn inkjet printer to a larger ink supply system, lowering your ink and production costs. Rather than buying expensive ink cartridges, you can use either a one gallon or five gallon replacement ink container. Larger ink containers mean lower ink costs. Your production costs will also be lowered by shorter and less frequent requirements for ink supply changeover.

Easy-to-install Changeover Kit

The ABM Changeover kit includes everything you need to switch to the larger ink supply. Simply connect the tubing and insert the cap into the ink supply container. Kit comes complete with an adjustable, intermittent air pump with adjustable pressure.

Inks Available

Inks available for the Unicorn printer include standard or Safemark® food grade inks. Either ink is available in Black, Red, Blue or Green. Special colors or formulations are available on request.

ABM also supplies high quality inks for all popular inkjet printers including Marsh®, Videojet®, Little David®, Foxjet®, Diagraph®, Willett®, ITI®, Matthews®, Weber®, and Fas-co®.

Inks are available in formulations for standard valve-jet drop-on-demand, Hi-resolution peizo-electric and continuous jet inkjet printers.

Visit our website or contact us for more information about our inks to suit your printers or your special applications.
